

Berjaya Times Square – Enabled rapid decor installations at multiple locations with ZERO mall disruption, ZERO emission and ZERO noise

Night-time installations of decor became impractical with scaffolds and truck mounted boom constantly being erected/dismantled and the outriggers deployment. Genie machines replaced this tedious process, enabling rapid and efficient decor installation in multiple locations.

Project: Décor installation | Location: Malaysia | Time to Complete: 4 Nights

 <p>Easy to Deploy and Stow Away</p>	 <p>Zero Emission and Low Noise</p>	 <p>Narrow Width (1.79m) for Easy Access</p>
--	---	---

TRUCK MOUNTED BOOM	VS SCAFFOLDING	VS GENIE SOLUTION
Wide width - Not accessible into the mall.	Accessible into the mall	Narrow width - Accessible into the mall.
Engine exhaust emissions. Noisy - Not suitable for indoors	No emissions	No emissions – Quiet and clean. Suitable for indoors
Multiple installation points made it impractical. Longer time taken to deploy outriggers at each point	Multiple installation points made it impractical. Erection and dismantling required daily before the next morning	Easy to maneuver to tackle each installation point. Easy to deploy and stow away
