### **Genie Delivers 100 GS™-1932 E-Drive Scissor Lifts to HSS Hire**

*A compact footprint, light weight and manoeuvrability in tight spaces make Genie® E-Drive scissor lifts ideal for industrial applications in Ireland*

Dublin (20<sup>th</sup> July 2023) – To support its customers who need smaller lifts when working in tight spaces, HSS Hire has taken delivery of 100 Genie® GS™-1932 E-Drive scissor lifts. HSS Hire, which has hundreds of depots across the UK and Ireland, says it expects its new lifts to be popular choices for the pharmaceutical industry and data centres across Ireland.

"The GS-1932 E-Drive is the preferred model of machine with our key customers," said Michael Killeen, managing director of HSS Hire Ireland. "The size makes them easy to pass through single or double doors, making them very popular on data centre sites. They also come with solid non-marking tyres, which are preferable on sites that require cleanroom standard machines."

Front wheel drive with zero inside turning radius makes GS-1932 E-Drive scissors easily manoeuvrable in tight spaces. The large platforms are a benefit, as they allow two operators to perform work side-by-side indoors. And, with a maximum working height of 7.85 m / 25 ft 3 in, GS-1932 slab scissor lifts have the reach needed for work in large spaces, including electrical work in data centres.

The GS-1932 E-Drive weighs just 1,329 kg / 2,929 lb, making it ideal for work on sensitive floors. With a compact machine width of 0.82 m / 32.2 in and length of 1.83 m / 6 ft stowed and 2.72 m 8 ft 11 in stowed, with platform extended, the GS-1932 E-Drive can pass through single or double doorways with the folding guard rails lowered.

Powering the E-Drive scissors are brushless, fully sealed, maintenance-free AC electric drive motors, which deliver industry-leading efficiency and a 35% reduction in lifetime maintenance costs. And with 70% fewer hydraulic hoses and fittings, maintenance is simple, reducing the total cost of ownership.

"Our engineering team have years of experience with Genie machines and find their on-board diagnostics simplify their service as well," Killeen said.

###

#### **About Genie**

Since 1966, Genie has been the leading name in the aerials industry. With offices, team members and manufacturing facilities around the globe, Genie lifts and telehandlers can be found enhancing safety and improving productivity on jobsites worldwide. Genie's ongoing leadership in aerial lifts and material handlers is built on our ability to consistently deliver superior quality for our customers. At Genie, we achieve this **quality** not by chance, but **by design**. For more information on Genie products and services, visit [www.genielift.com](http://www.genielift.com).

#### **About HSS Hire**

With over 60 years of experience in tool and equipment hire, HSS Hire have the knowledge and expertise to ensure your hiring needs are in safe hands. They strive to deliver value and quality to their customers, offering products from industry-leading manufacturers and low trade prices. For more information on the wide range of products and services supplied by HSS Hire, please visit <https://www.hss.com/hire>.
