Wittrock Group, Ulferts & Wittrock and Ulferts Take Delivery of 234 Genie Machines *The deliveries include next generation GS scissor lifts, TraX boom lifts, and a “super boom”*

Bremen, Germany (April 22, 2026)—Genie recently completed the delivery of a significant machine order to Wittrock Group, Ulferts & Wittrock and Ulferts. The 234-machine order included next-generation GS™ scissor lifts, TraX™ boom lifts, and a ZX™-135/70 “super boom.”

The deliveries represent a significant milestone in the relationship between Genie and the companies—Wittrock Group, Ulferts & Wittrock and Ulferts—which are led by partners Oliver Herrmann, Marcus Wittrock, and Temmo Niekamp. Together, the companies operate one of the largest rental fleets in Germany with approximately 6,000 mobile elevating work platforms.

Broad Delivery Package: From Compact to Heavy -Duty

The delivery includes a diverse portfolio of Genie lifts:

- Scissor lifts with working heights from 6 m to 16 m
- S®- and Z®-booms with working heights from 16 m to 43 m
- Electric-, hybrid-, and diesel-powered machines

Next -Generation GS Scissor Lifts Delivered in a Complete Package

A highlight of the delivery is the complete range of Genie’s next-generation GS scissor lifts, which were announced in late 2024. The new scissor lifts represent a complete overhaul of this classic lift category, offering higher efficiency, improved service accessibility, lower operating costs, along with Genie’s state-of-the-art E-Drive technology.

Wittrock Group, Ulferts & Wittrock and Ulferts are the first in Germany to acquire this new scissor lift series in a large package, a strong signal of the companies’ commitment to innovation and confidence in the new technology and design.

Boom Lifts Include TraX Models and the ZX-135/70 Super Boom

The delivery also includes several special machines:

- Genie S-45 TraX
- Genie S-65 TraX
- Genie S-80J TraX

These TraX models offer outstanding offroad capability thanks to their track based chassis.

The package is complemented by the addition of a Genie ZX135/70 articulating boom lift, a flagship in height access technology that further strengthens the group's high reach fleet capacity.

Genie's Commitment to Service and Support Contribute to a Successful Delivery

The deliveries were supported on Genie's side by Stephan Franssen, Territory Sales Manager for the entire group from North to East to South, and Markus Bandura, Sales Director Genie. Both coordinated closely with the companies, ensuring a smooth process and high quality of the delivered machines.

"This significant investment signals positive momentum in our business relationship, and we are proud of, and honored by, the trust placed in us by the partners," said Franssen. "With the new next-generation scissor lifts, the TraX models, and the ZX-135/70, we have jointly strengthened these fleet for the future," says Stephan Franssen.
