GENIE® LIFT TOOLS™ EXPO INSTALLER INCREASES PRODUCTIVITY AT HEIGHT *Allows for precise, easy placement of signs, banners and hanging décor at height*

REDMOND, WA (November 15, 2018) – Designed to make operators more efficient when working at height, the new Genie® Lift Tools™ Expo Installer allows for precise, easy placement of signs, banners and hanging décor. Ideal for use in convention centers, arenas, malls, theaters and other locations that decorate with suspended ornamentation, this new accessory helps to maximize safe productivity while operating Genie booms. This accessory is ANSI certified and is currently available in North America. It will be available in select areas of Europe, Middle East, Africa and Russia (EMEAR) in the future, pending CE certification and country-specific regulations approval.

What is it?

The Genie Lift Tools Expo Installer is an indoor-use only aftermarket accessory, available through Genie Genuine Parts, designed for 6-ft and 8-ft articulating and telescopic boom platforms. This new option allows operators to hang signs, banners and décor at height.

How does it work?

Similar in design to the popular Genie Fall Arrest Bar accessory, this productivity tool boasts a sliding track design with two trolleys that can carry a combined capacity up to 240 lb (108 kg) and can be used with various rigging types for easy and precise décor placement. When lifting to height, brake pads secure the trolleys from sliding when machine is in motion.

How is it used?

For fast setup and removal, the Genie Lift Tools Expo Installer can be attached quickly and easy to a boom platform by one person in about five minutes.

Targeting real-world applications, this new accessory is approved for use with Genie® boom models:

- Z®-45/25J, Z-45/25 RT, Z45/25J RT, Z-45 XC™, Z-51/30J RT, Z-60/37 DC, Z-60/37 FE
- S®-40, S-45, S-60, S-65
